

# TACTICAL SERIES SINGLE CSU ENCLOSURE

## ORDERING INFORMATION:

TAS.20-10106-04.00

## FEATURES

- Compatible with:  
One Channel Supervisory Unit
- Built in Standoffs for Accessory Devices
- Easy Installation with Mounting Points
- Large Plexiglass Windows for Secured Viewing
- Install Locally Required Lock Cylinder
- Red Matte Finish for Fire-Safety Application
- Includes Door Open Sensor

Installed next to the fire alarm control panel, the single CSU enclosure supports the equipment required for an integrated radio enhancement system. Easily installed with the built-in mounting mechanism, a single Channel Supervisory Unit can be installed inside this enclosure.

The large glass windows allow non-emergency responders to view the health of the installation without having physical access to it. When required, the incident commander can access the unit with a locally recognized key.
